SUMMARY

Results-driven Senior Test Automation Engineer with 4+ years of experience designing and delivering scalable test frameworks across UI, API, and performance testing domains. Proficient in WebDriverIO, Selenium, REST Assured, and K6, with hands-on expertise building end-to-end automation suites for complex, event-driven systems on AWS. Experienced in integrating AI-assisted tooling to accelerate test case generation and defect analysis, reducing manual effort and improving coverage quality. Skilled in building and maintaining CI/CD pipelines using GitHub Actions, including reusable shared workflows and automated daily test runs. Adept at performance engineering — designing load scenarios at production scale with real-time observability through New Relic dashboards. Strong collaborator in cross-functional, cross-timezone Agile teams with a track record of owning QA from sprint planning through UAT and production release

EXPERIENCE

Senior Test Automation Engineer

03/2024 - Present

FPT Software

- Developed comprehensive Test Automation and Performance Testing frameworks, integrating with CI/CD using GitHub Actions for aligned project delivery.
- Created AI-powered test automation solutions, maintaining high pass rates across UI, API, and database layers, and reducing case creation time by 40%.
- Designed and executed load testing scenarios with K6, integrated New Relic for monitoring, and ensured software quality through E2E automation frameworks and defect management.
- Prioritized and refined backlogs with product teams, optimizing sprint planning and ensuring alignment with product goals.
- Managed and validated UAT cycles and production releases, ensuring compliance with security and performance standards.
- Streamlined automation processes using GitHub Copilot and AWS CodeBuild, including the creation of database migrations and security exception management.
- Migrated over 100 automated test cases from Selenium WebDriver to Playwright and reduced manual test creation time by 70% with MCP Server.
- Implemented Spec-Driven Development project, reducing customer call costs by 60% for vehicle delivery orientation.

Accionlabs

Software QA Engineer

07/2022 - 01/2024

Accion Labs

- Led the implementation of Agile processes using SCRUM and JIRA/Xray, enhancing team efficiency and workflow quality.
- Developed automated test scripts with Selenium WebDriver in Python for Cloud Web Services and executed BDD using Cucumber.
- Conducted REST and SOAP API automation with Postman, significantly improving integration and performance testing capabilities.
- Applied Kusto Query Language (KQL) and SQL for comprehensive database analysis to drive data-driven testing strategies.
- Performed extensive manual and hardware testing on IoT devices, demonstrating strong proficiency in hands-on testing.
- Produced detailed documentation including testing reports, bug reports, and test cases supporting continuous improvement initiatives.
- Mentored two junior engineers in test plan creation and automation with Selenium, fostering team knowledge and capability growth.

SKILLS

Technical Skills

Agile Methodologies (Scrum, Kanban) · Jira · Jira Portfolio · Confluence · Rally · Java · JavaScript · AWS · Elasticsearch · MySQL · Test Strategy Development · Oracle · Bitbucket · GitHub · RESTApi · Postman · RESTful Microservices · Splunk · Continuous Integration · Continuous Delivery · Automated Testing · Selenium · Cypress · Playwright · WebdriverIO · JMeter · Gatling · K6 · Allure Reports · Python · MCP · Generative AI · Spec-Driven Development · Software testing with AI · GitHub Copilot · Cucumber · Smoke Test · Regression Test · Unit Test · Integration Test · Test Planning Documentation · Stakeholder Reporting

Soft Skills

Attention to detail · Analytical thinking · Problem-solving · Communication · Collaboration · Critical thinking · Adaptability · Time management · Accountability · Continuous learning · Initiative · Root cause analysis · Customer-focused mindset · Quality ownership

CERTIFICATIONS

Certified Tester Foundation Level (CTFL)

ISTQB

EXPERIENCE

Quality Assurance

FYWARE

07/2021 - 07/2022

- Improved technical communication proficiency through daily collaboration with international teams from Germany, US, and Mexico.
- Manually tested over 80 test cases in Android and iOS devices for an Augmented Reality app that helps industry workers to follow instructions interactively instead of paper guidelines and reduced onboarding costs by 37%.
- Agile testing, SCRUM as agile methodology and JIRA as bug tracking tool.
- Used Selenium WebDriver in Python to create over 50 test cases for a user management web page.
- Used Postman to create over 120 test scenarios with testing automation for a backend API.
- Performance testing using Android Studio, Xcode, JMeter and GTmetrix that helped to identify the workflows taking more time to load resources and peak loads.
- Develop 400+ test cases for a web platform, an Android/iOS app and a backend API.

EDUCATION

Telecommunications and Computer Engineering

Universidad Politecnica de San Luis Potosi

2017 - 2021

CERTIFICATIONS

Certified Tester, Agile Tester (CTFL-AT)

ISTQB

Certified Tester Advanced Level Test Automation Engineering (CTAL-TAE)

ISTQB

AWS Certified Cloud Practitioner

AWS

Postman API Fundamentals Student

Postman

PCAP – Certified Associate in Python Programming

Python Institute

CPA – C++ Certified Associate Programmer

C++ Institute

Certified Professional Selenium Tester (CPST)

Selenium

Microsoft Office Specialist: Microsoft Office Word 2013

Microsoft

Microsoft Office Specialist: Microsoft Office PowerPoint 2013

Microsoft

Microsoft Office Specialist: Microsoft Office Excel 2013
